### Midland Musings

Students in Mrs. Prosser's first and second grade classes are observing busy ants at work in their classroom ant farm. Students found some interesting ant facts in their research. Vivian reported that worker ants can live one to five years and queen ants can live up to 30 years! Gabriel says there are over 12,000 different species of ants and Jack wrote that ants can build their colony 50 feet long and 20 feet high! Abigail learned that when a queen ant dies, the whole colony dies soon after. King Solomon advised; watch the ants, consider how they live and learn from them. Proverbs 6:6-8.
